c) The two people selected as finalists of the round will have to take part in three tests, during which their memory, knowledge and skills will be tested.

d) The tests that the two finalists of the round will undergo are the following:

TEST 1/MEMORY

At random places of an illuminated panel divided into several squares, the logo of the EKO Smile application will appear amongst other logos and products of EKO. The panel will turn off. The two contestants will be asked, within a specific time limit, to remember the correct places where the EKO Smile application logo appeared, by clicking on a corresponding board on a tablet that they will have at their disposal. The winner will be the person who remembers the most logo marks. In case there is no winner, the challenge will be repeated (after 'shuffling' the squares on the illuminated panel) until there is a winner.

TEST 2/KNOWLEDGE

Joint questions will be addressed to the two contestants at the same time, to which they will have to answer in writing, within a specific time limit. The winner of the test will be the person who gives the most correct answers. In case there is no winner, the challenge will be repeated (with new questions) until there is a winner.

TEST 3/SKILLS

Each contestant will receive a small opaque bag. The bags will contain the same letters. The two contestants will be asked, at the same time, to open the bag that will have been given to them, and, using the letters within it, to form the name of the application ('EKO Smile') on a specific surface within a specific time limit. The winner will be the person who first forms the name in question, within a specific time limit. In the absence of a winner the challenge will be repeated until there is a winner.
