1

Launch the App

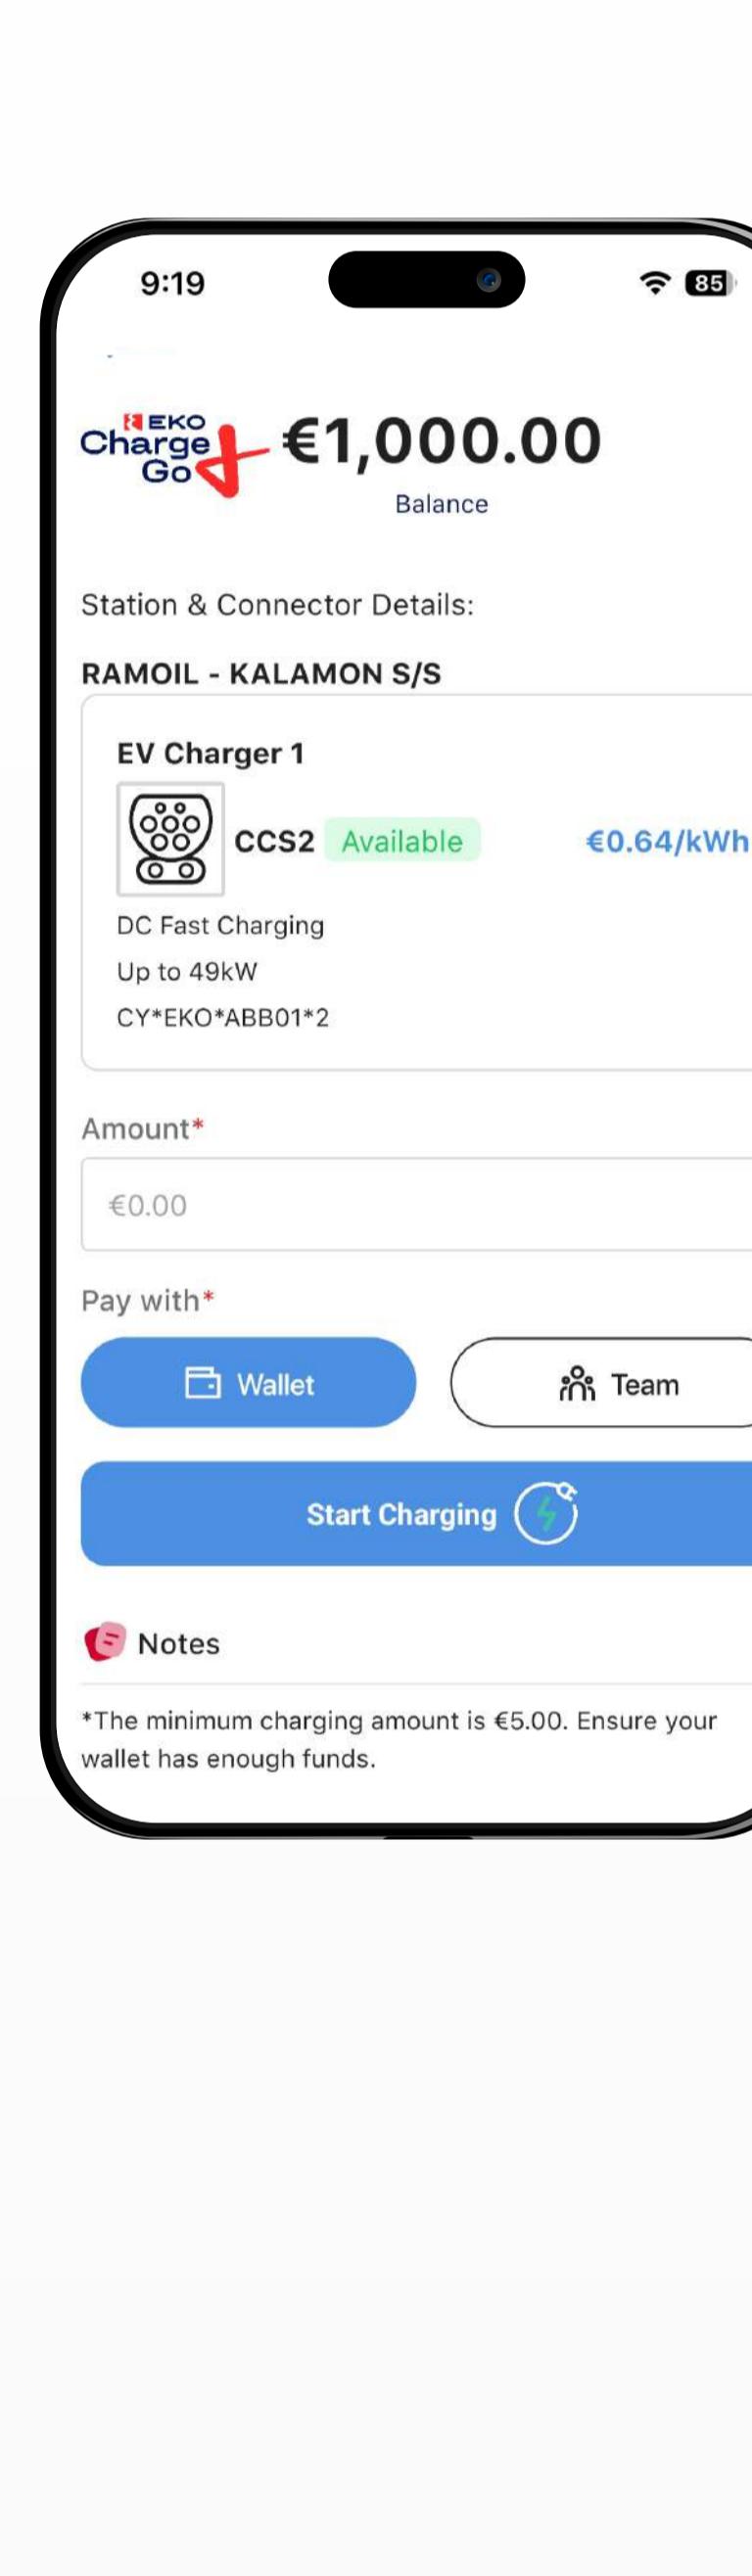

Upon launching the app, you will see the home screen as shown below.

2

In the home screen, you will see the "EKO Charge & Go" button under the "Services" section

- When you tap it, a popup will appear.
- Grant permission to the app to access your location.

3

If you are not at a charging station, a map with all available charging stations will appear, and you will need to select the one you wish to use.

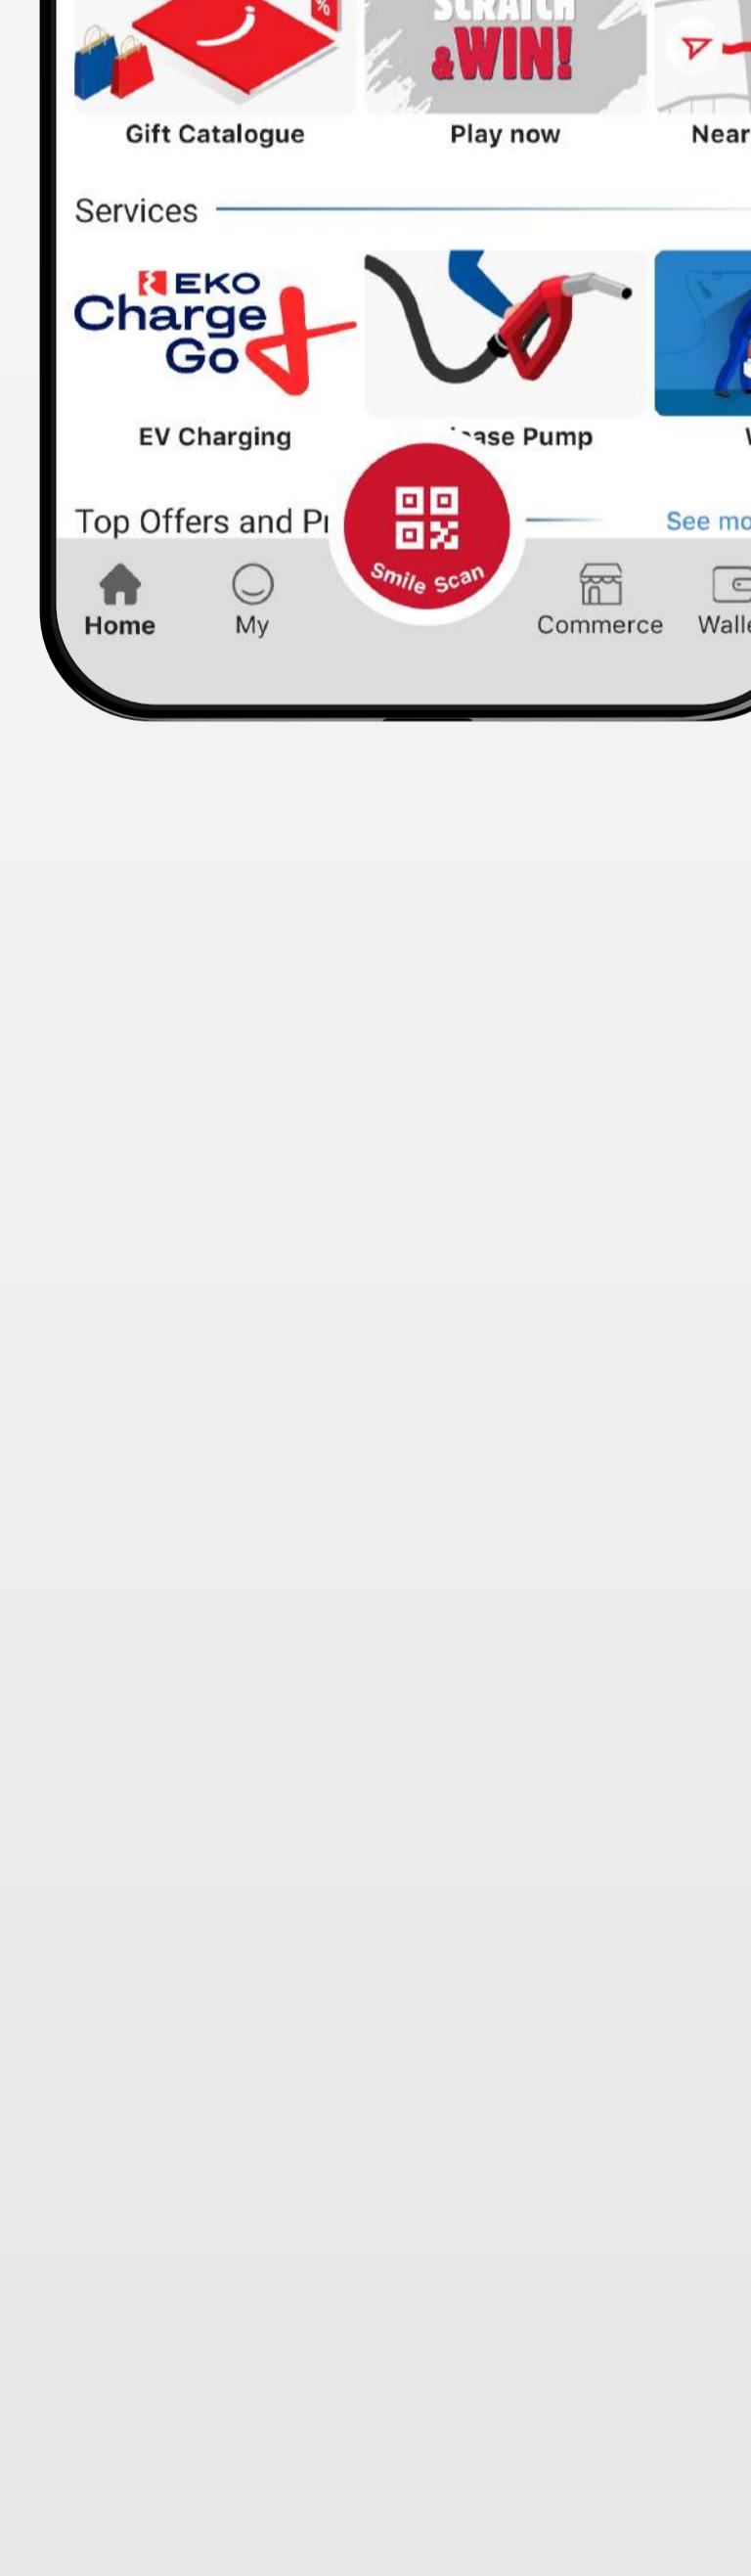

With the "Scan & Charge" button, you are taken directly to the available connectors by scanning the QR code on the charger

If you are at a charging station, then the screen shown in Step 4 will appear, displaying all the information for the current charging station.

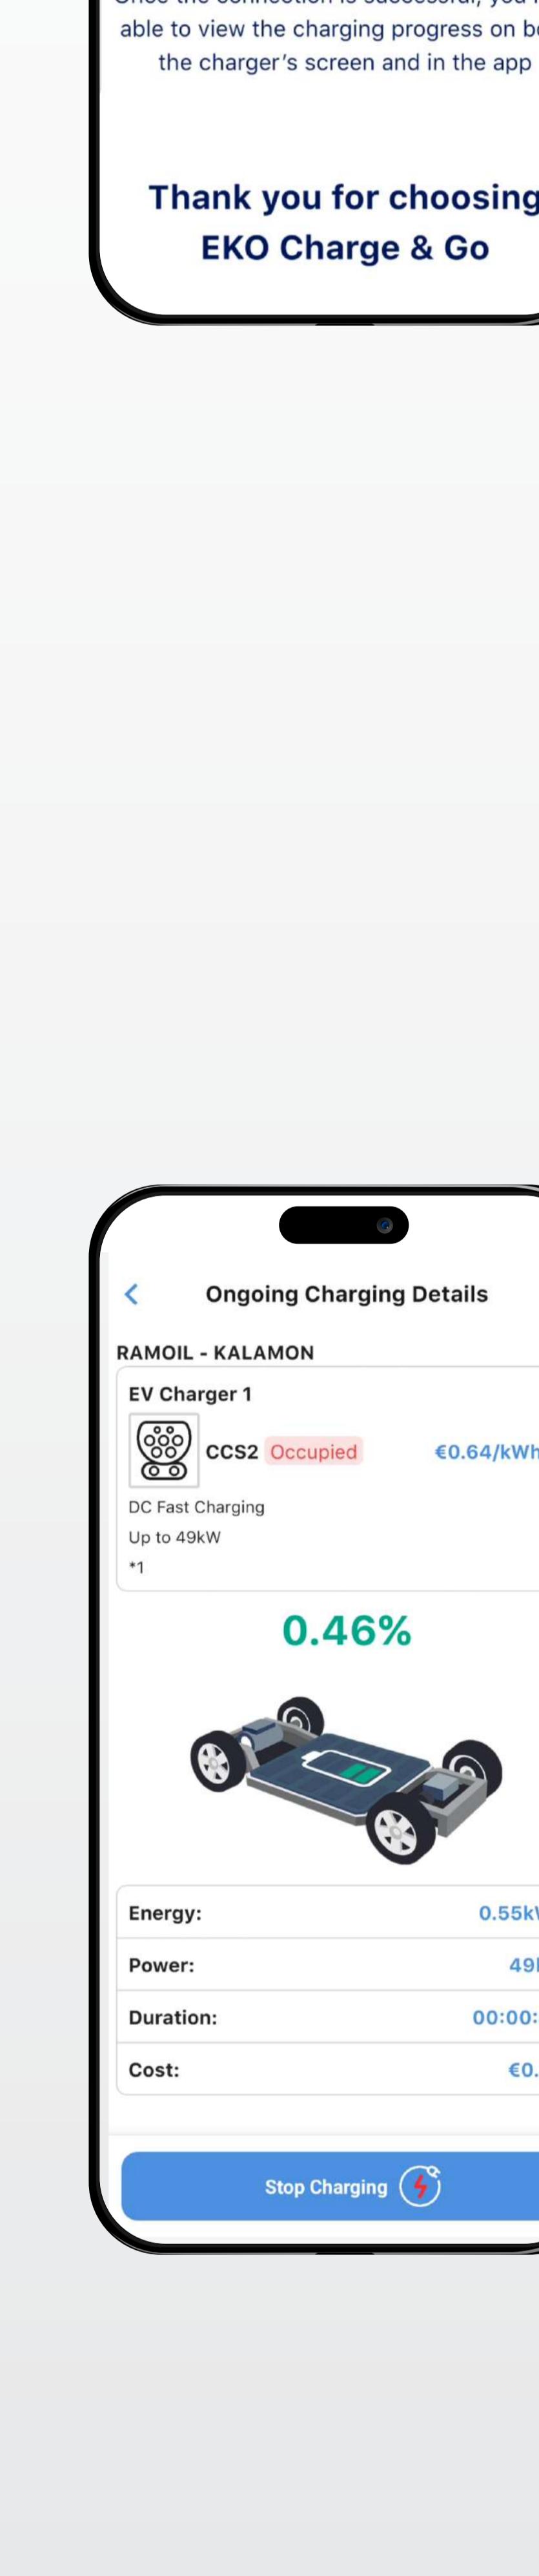

4

Tap Continue to proceed.

5

Choose the appropriate charging connector.

6

Charging connector verification: Confirm by selecting "Yes".

7

Enter the desired amount to be charged. Make sure that your wallet has sufficient balance.

Tap "Start Charging".

8

You are now ready to charge.

- Plug the right connector into your car's charging port.
- Choose the right connector on the charger's screen to start the charging session.

9

Tap on the "Ongoing Charging Session" button to monitor your charging session live.

10

Monitoring your charging session:

- View real time energy consumed, charging speed, time duration and current cost of recharging session (for update of recharging session by scrolling down)
- Stop the charging session by tap "Stop Charging".
